

FORCE ENGINEERING

26th February 2010

Force Engineering Ltd and Force Engineering (International) Ltd are pleased to announce the completion of the move to our new premises.

The major refurbishment was completed at the end of last month and the installation of production equipment and office facilities is now complete and we are again at full manufacturing capability.

We're already seeing the benefits of the new building in terms of production capacity, flexibility and efficiency. Enhancements to the design, development and production facilities will continue over the next few months as we settle into the new building and further refine our new processes and procedures.

We look forward to welcoming you to our new home when you next visit.

Neil Foster
Operations Director
